

LARGE POPPERS

PEDESTAL STYLE

It's not just how much corn you pop, it's how well you pop it. That's the philosophy behind our high-volume **Giant Poppers**, which let you pop anywhere from a small amount to a mountain of popcorn. These Cretors poppers are designed as compatible components in your production system. Designed to operate efficiently behind the scenes or up front, they're ideal for theaters, shopping malls, stadiums and arenas.

Our Giant Poppers are designed to work with three distinct cabinet configurations: Open Top President, Enclosed Top President, and President without top. The Giant Poppers also work with four different table sizes: 3.5, 4.5, 6 and 6 ft Twin. The poppers can be built directly into custom millwork and are available in gas or electric power.

Electric Giant Pedestal Popper

- 20, 32, 48, and 60 oz kettles
- Digital readout ensures accurate temperature settings and readings
- Cycling pilot light
- Lighted rocker switches

Gas Giant Pedestal Popper

The unique enclosed burner collar keeps the flame contained and positioned directly under the bottom of the kettle, increasing heat efficiency and channels hot exhaust.

- 12, 32, and 60 oz kettles
- Propane or natural gas
- Safety pilot automatically cuts off gas if pilot burner goes out (32 and 60 oz only)
- Electric direct drive motor
- Requires small amount of electrical power (contact your Cretors representative for further details)
- Lighted rocker switches
- Easy-to-read controls

60 oz features:

- Exhaust vent located on back of kettle
- Digital readout ensures accurate temperature settings and readings
- A safety off switch automatically turns off burner flame when the kettle is lifted for dumping. The flame automatically relights when the kettle is placed back into the cooking position
- Cycling pilot light with digital temperature controller
